Come climb the second most frequently climbed mountain in the world, after Japan's Mt. Fuji. Its clearly marked foot trails lead to a bare rock summit, which provides 100 mile views to points in all six New England states.

We will be camping in a group site in the quiet camping area at the base of Mt. Monadnock, where there are flush toilets and running water. *For more information go to <http://www.nhstateparks.com/monadnock.html>.*

As always, parents are invited to attend. This is a great opportunity to spend some time with your son.
